

## Foreman - Feature #12718

As a user I would like to receive proxy log data: proxy initialization, proxy loading errors, plugin initialization, plugin initialization errors

12/07/2015 04:00 AM - Shlomi Zadok

#### Revision 33d9f9ee - 02/03/2016 08:35 AM - Lukas Zapletal

Fixes #12718 - smart proxy log table

This patch adds a table with logs fetched from Smart Proxy /logs new API. It returns latest N log entries from a simple memory buffer. The table supports filtering by level, custom filtering and it introduces several overview status cards with error/warning counts, failed modules list with latest known error messages.

Ok taking, I am going to create the UI for

[https://github.com/witlessbird/smart-proxy/blob/events/modules/root/root\\_api.rb#L32-L46](https://github.com/witlessbird/smart-proxy/blob/events/modules/root/root_api.rb#L32-L46)

as another tab in the smart-proxy show page, if I read this correctly. Correct me if this is wrong.

**#8 - 01/13/2016 06:29 AM - Shlomi Zadok**

The purpose of this feature is to display how the proxy and its plugins have loaded (or if they didn't load, why). The UI should display data from <proxy>/events/logs and highlight errors

**#9 - 01/13/2016 06:31 AM - Lukas Zapletal**

Thanks, so I am going to create a table of events with some filtering (errors only, warnings, per-module).

**#10 - 01/13/2016 08:07 AM - Shlomi Zadok**

- Subject changed from *As a user I would like to consume the additional Proxy information via the API* to *As a user I would like to receive proxy log data: proxy initialization, proxy loading errors, plugin initialization, plugin initialization errors*

**#11 - 01/19/2016 06:34 AM - Lukas Zapletal**

Ok I am working on this one right now.
