Pull request:	
Description	
Ruby 2.0.0 packages are available from the brightbox/ruby-ng repository, so it's probably possible to switch from the 1.9.3 build to 2.0.0 relatively easily.	
I tried a quick build but it failed with the old version of Bundler in 12.04. We would need to provide updated ruby-bundler and ruby-thor packages at least.

- Blocks Refactor #8884: Drop Ruby 1.9.3 support added

#2 - 12/07/2015 08:48 AM - Dominic Cleal

Alternatively, we drop support for 12.04 and support 14.04 (and soon, 16.04) only.

#3 - 12/07/2015 08:55 AM - Ewoud Kohl van Wijngaarden

I'd be in favour of dropping 12.04. Ping the mailinglist?

#4 - 12/07/2015 02:21 PM - Anonymous

I'd also say *if* we have to drop Ruby 1.9.3 support, drop support for Ubuntu/precise and Debian/wheezy.

#5 - 12/08/2015 03:03 AM - Dominic Cleal

OK, that's fine by me too. I'll e-mail closer to the time.

I'm expecting to have to drop it within the next two months in response to Fog 2.0.0, but that has been delayed a few times.

#6 - 12/08/2015 03:03 AM - Dominic Cleal

- Status changed from New to Rejected

Closing, but patches also welcome if somebody wishes to take it on.
