<b>Description</b> Hey guy so i want to run foreman on a debian 7.9 VM on this adress foreman.mediaman.local but overtime i start the foreman installer i get this.  Something went wrong! Check the log for ERROR-level output <ul style="list-style-type: none"><li>• Foreman is running at <a href="https://mediaman.foreman.de">https://mediaman.foreman.de</a></li></ul> How can i change that so that it is running on foreman.mediaman.local  Any ideas i reloaded the config off the smart proxy already.	
<b>Related issues:</b> Is duplicate of Installer - Support #12759: Foreman Installation Error <span style="float: right;"><b>Resolved</b>    <b>12/10/2015</b></span>	

#### History

- Is duplicate of Support #12759: Foreman Installation Error added

##### #2 - 12/11/2015 03:28 AM - Dominic Cleal

- Status changed from New to Duplicate

You've already got a ticket open at [#12759](#), please don't create more bug reports for support issues. I'm closing this one.

This isn't the best place to get support (it's our bug tracker), especially for basic server configuration issues. You may get more help by using our foreman-users mailing list or #theforeman IRC channel (<http://theforeman.org/support.html>).
