Foreman - Bug #12859

"Suggest new" link for IP address on interface model window doesn't work

12/17/2015 02:01 AM - Sachin Ghai

Status:	Closed		
Priority:	Normal		
Assignee:	Marek Hulán		
Category:	Network		
Target version:	1.10.1		
Difficulty:		**Fixed in Releases:**

Bugzilla link:		**Red Hat JIRA:**	
Pull request:	https://github.com/theforeman/foreman/pull/2989		

Description

I defined two interfaces 1) Primary and 2) Provisioning with different subnets. However, for none of them the "suggest New" IP link works. I didn't get any error in firebug nor in any logs. Nothing happens on clicking the link.

reproducible with version:
foreman-release-1.11.0-0.develop.201512091815git0e9b35e.el7.noarch

History

#1 - 12/17/2015 02:21 AM - Marek Hulán

Could you please verify that the IPAM is not set to none on any of these subnets? Could you please also capture production.log and proxy.log while you click on the link?

#2 - 12/17/2015 02:50 AM - Dominic Cleal

- Status changed from New to Need more information

#3 - 12/17/2015 04:10 AM - Sachin Ghai

Yeah, I've defined two subnets. 1) for primary, where I set the IPAM to Internal DB. 2) for provisioning, where I set the IPAM to dhcp.

All dhcp and dns orchestration is set around the provisioning subnet. On clicking, "Suggest new" no logs are being generated.

- Status changed from New to Assigned

- Assignee set to Marek Hulán

- translation missing: en.field_release set to 104

Introduced by (accidental) removing of emptying the IP field, for more details see
https://github.com/theforeman/foreman/pull/2650/files#diff-63d9ef3bbe6ac020529a197ac7aa171bL523ac020529a197ac7aa171bL523

Not a blocker but should be fixed in 1.10.1 I think
