

Foreman - Bug #1289

Foreman lists the proxy host instead of proxy name

11/01/2011 06:01 PM - Corey Osman

Description	
<p>I have multiple proxies on a single host managing dhcp. When I use foreman --> subnets. The proxy name shows up as the proxy host. This is confusing because I don't know which proxy is associated with which subnet.</p> <p>To fix this the proxy name and not the proxy hostname should be used instead. Secondly, can you make the proxy name clickable and point to the proxy when clicked.</p>	

History

#1 - 11/02/2011 03:18 AM - Ohad Levy

- Project changed from Smart Proxy to Foreman

#2 - 01/29/2012 08:15 AM - Ohad Levy

- Status changed from New to Resolved

I'm not sure, but on my latest version the name shows up.
