Description	
Hello,	
when dhcp.lease get's removed, corrupted, refreshed , reinstalled we start to observ "IP address has already been taken" false positive errors.	
I think , this should not be the case.

- Status changed from New to Rejected

Not much we can do if the leases file is missing or became corrupted -- current implementation of dhcp_isc module is completely dependent on its successful parsing (changes due to normal dhcpd operations are ok though).

Should leases get deleted or corrupted, create an empty leases db file, restart dhcpd, and then restart the proxy.
