I'm tentatively removing this from the 1.11.0 blocker list as it appears the changes are more to fix deprecations and not bugs. Please correct me if I've missed something important that will be needed in 1.11.

Dominic - as far as I can tell none of these are breaking changes, if anything breaks we can cherry pick back to 1.11.1 if needed. This should however land in 1.12 so that hopefully by 1.13 we can get to jQuery 2 or even 3.
