

Foreman - Bug #12949

In Openstack, external networks should be allowed to be selected for the main network of an instance

12/28/2015 08:25 AM - Imri Zvik

Status:	Closed	
Priority:	Normal	
Assignee:	Imri Zvik	
Category:	Compute resources - OpenStack	
Target version:	1.11.0	
Difficulty:		Fixed in Releases:
Triaged:		Found in Releases: 1.9.3
Bugzilla link:		Red Hat JIRA:
Pull request:	https://github.com/theforeman/foreman/pull/3007	
Description		
This is a valid configuration - for example when provider networks are being used, and you want to place the instance directly into that network. Also, one should be able to set the floating IP network to be back to "None"
