

Foreman - Bug #12978

foreman-debug -m 0 to collect all files

01/04/2016 07:55 AM - Pavel Moravec

Status: Closed	
Priority: Normal	
Assignee: Pavel Moravec	
Category: foreman-debug	
Target version: 1.11.0	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link: 1295419	Red Hat JIRA:
Pull request: https://github.com/foreman/foreman/pull/3021	
Description	
Description of problem: foreman-debug should have an option to collect all logs. It already has option -m to limit number of lines per file collected, but -m0 means files are empty ("tail -n0" is called).	
Please fix -m 0 to collect whole file, not its zero-length tail.	
Version-Release number of selected component (if applicable): foreman-debug-1.7.2.49-1.el7sat.noarch	
How reproducible: 100%	
Steps to Reproduce: 1. foreman-debug -m 0 2. unpack the generated archive 3. we foreman-debug*/var/log/katello-installer/katello-installer.log	
Actual results: 3. shows empty logfile collected	
Expected results: the collected log file should be the same like original

Revision 51f005e1 - 01/07/2016 03:15 AM - Pavel Moravec

Fixes #12978 - foreman-debug -m 0 to collect all files

For -m 0, call "cat" instead of "tail -n \$MAXLINES"
