```

and their hook script:

1. pwd
   /usr/share/foreman/config/hooks/host/managed
2. cat after_update/test.sh
   #/bin/bash

logger -t HOOK $1 and $2

cat /dev/stdin >> /tmp/HOOKIN
echo >> /tmp/HOOKIN

They've also provided a screen capture of the parameters section showing the data appearing.

I'll be attaching that momentarily.

Please let me know what other data from Credit Suisse you need to make forward progress or offer suggestions.

Is duplicate of Foreman - Bug #11763: Host API does not return all parameters...	**Closed**	**09/10/2015**

History

#1 - 01/04/2016 10:49 AM - Dominic Cleal

- Is duplicate of Bug #11763: Host API does not return all parameters (e.g. from locations, et al.) added

#2 - 01/04/2016 10:49 AM - Dominic Cleal

- Status changed from New to Duplicate

Should already work in 1.10-stable.

#3 - 01/05/2016 04:46 PM - Bryan Kearney

- Subject changed from Host API does not return all parameters (e.g. from locations, et al.) to Host API does not return all parameters for locations

- Status changed from Duplicate to New

OPening this back up. Shlomi discussed this in the bug:

<SNIP>
Sorry for the late response.
It seems that this is another bug.
This bug resolves displaying all parameters for **Host**,
Whereas the bug you are presenting is that we are not displaying all parameters for **Location**
I believe this is worth opening a new bug (and we'll solve it faster than I respond to bugzillas :))
</SNIP>

#4 - 01/06/2016 02:53 AM - Dominic Cleal

- Description updated

- Status changed from New to Need more information

- Priority changed from High to Normal

Please clarify then, since the bug title you set says "Host API" (as in GET /api/hosts/:id?) and the bug report shows using the foreman_hooks plugin again with hosts - that would be fixed by the bug I referenced. The description here doesn't show any bug with the host API.

> Whereas the bug you are presenting is that we are not displaying all parameters for Location

The bug desc also shows Hammer output of locations, but that's not related to hosts at all. Are you reporting a bug against the hosts or the locations API?

#5 - 02/17/2016 02:46 AM - Shimon Shtein

I have checked the "hammer location info" command against the development, and it seems to work fine: got the parameters back as expected. Didn't check inheritance though...

#6 - 02/17/2016 03:02 AM - Dominic Cleal

- Status changed from Need more information to Resolved
