Description	
A few minor issues on the Puppet class edit form since #4629 , observed in Chrome:	
<ol style="list-style-type: none">1. Checkboxes and labels are not aligned throughout the form2. "Optional input validator" section open/close ">" icon touches the text in the heading3. Matchers margin on the left is wider than all other sections, and compared to what it was previously4. Matcher attribute and value fields have a lot of space between them
