Description	
<p>The fix for #13075 affected every page that uses status icons as well as text, it wasn't confined in any way to the padding between the icon and text on host#show.</p> <p>Two instances of this:</p> <ol style="list-style-type: none">1. The status icons and host names on hosts#index are now indented too far to the left, so the padding around the whole cell (top-left-bottom) is inconsistent.2. The status icons on host#show are now out of line with the text in the cells below. <p>It has fixed the padding between icon and text, but the same class that was changed is applied to the icon as well as the text.</p>
