<b>Description</b>	
<p>With safemode enabled, rendering of the default kickstart_networking_setup snippet fails as some of the lookups (probably @host.managed_interfaces or similar) are now relations rather than arrays.</p>

fixes #13168 - permit safemode templates read-only access to AR relations

Templates such as kickstart\_networking\_setup use relations of Host::Managed to access network interfaces. Since Rails 4, these return relation objects rather than arrays which being core Ruby, had permitted methods defined in safemode itself.
