Foreman - Bug #13245

Apipie json returns duplicated methods

01/15/2016 10:55 AM - David Caro

Status:	Closed		
Priority:	Normal		
Assignee:	Shlomi Zadok		
Category:	API		
Target version:	1.11.0		
Difficulty:	trivial	**Fixed in Releases:**	
Triaged:		**Found in Releases:**	1.9.2
Bugzilla link:		**Red Hat JIRA:**	
Pull request:	https://github.com/theforeman/foreman/pull/3162		

Description

When retrieving the apipie json file to get the api definition, it returns a duplicated method (exactly the same method for the same resource with the same params overt the same http method):

For the full json file see
https://gist.githubusercontent.com/fatmcgav/018a26acdf0aeb99b655/raw/e3f92d8c600a27893662336f6f1bdc5d3e9283c3/1.9.2-v2.json

The extract: {
"short_description": "List storage_domains for a compute resource",
"deprecated": null,
"http_method": "GET",
"api_url": "/api/compute_resources/:id/available_storage_domains"
},   {
"short_description": "List storage domains for a compute resource",
"deprecated": null,
"http_method": "GET",
"api_url": "/api/compute_resources/:id/available_storage_domains"
},

It's not a big issue, but probably an indicator that something fishy is going on.

- *Difficulty set to trivial*

There are two "api :GET" lines for exactly the same path in app/controllers/api/v2/compute_resources_controller.rb. The first (without N_()) should be deleted.
