Pull request:	
Description Adding a BMC IP and BMC Host Name does not manage DNS at all. It only does the DHCP reservations.	

Associated revisions

Revision 8838eb42 - 12/26/2012 08:49 AM - Ohad Levy

fixes #1814 - converts sp_* attributes into a BMC interface class

this patch also includes the following

- added a new interfaces table, and STI objects to represent a NIC, BMC, Managed and a bootable interface.
- refactored DHCP/DNS orchestration code, so they can work on the interface objects and on the primary interface information that still reside in the hosts table.
- added basic UI for interface selection

this refactor also helps to simply refactoring the host object into multiple objects.

this patch also fixes
fixes #1325 - BMC NIC should also create DNS entry
fixes #1813 - allow to support multiple NIC per host

History

#1 - 12/14/2012 04:25 AM - Oliver Weinmann

I just noticed this too.

Any clue when this will be implemented?

Regards,
Oliver

#2 - 12/14/2012 08:12 AM - Ohad Levy

- Assignee set to Ohad Levy
- Target version set to 1.1

its actually part of the new interface branch, this will be included too.

#3 - 12/26/2012 08:56 AM - Ohad Levy
