Description

Any certificates that are revoked do not return a state in the API, instead of returning 'state': 'revoked'

Revision bcf80519 - 01/18/2017 08:29 AM - Dmitri Dolguikh

Fixes #13318 - Revoked certs always have state 'revoked'

Serial numbers from the CRL are now compared correctly to the inventory
as integers.

Same in version 1.13.0.

I delete a host, then revoke the cert belongs to the host i deleted. Filter the listing by "revoke", empty list. Filter by "all", display the cert i have revoked but the state field is empty.
