Description

Class parameters with names longer than 17 characters are truncated in the host edit page. If you have multiple parameters with similar names that are truncated to the same string then when you override one of the parameters, all of them are overridden.

Example screenshot attached, I clicked the "override" button once and it has overridden 11 parameters

Fixed on 1.10-stable directly in https://github.com/theforeman/foreman/commit/e81cef4c2d5235210d9afef373ef882685b8569d, not applicable for develop as the refactoring in #11458 also fixed it there.
