Description	
Rails should be updated to 3.2.22.1 to provide fixes for a number of CVEs (http://weblog.rubyonrails.org/2016/1/25/Rails-5-0-0-beta1-1-4-2-5-1-4-1-14-1-3-2-22-1-and-rails-html-sanitizer-1-0-3-have-been-released/).	
This bug is only applicable to the 1.10-stable branch.

This might have to be rejected, as apipie-rails has a bug ([#13710](#)) that would probably affect 1.10-stable. It's a bit worse here too, because 1.10-stable's pinned to apipie-rails 0.2.x - it'd probably be safe to update, but we've not used that combination heavily.

#4 - 02/23/2016 06:06 AM - Dominic Cleal

- Status changed from New to Rejected

- translation missing: en.field_release deleted (123)

Rejecting this for now as I think the potential for breaking plugins is a bit too great.
