Description

After updating to foreman 1.10.1 we have a display problem with the widget "latest events". It looks like the table runs out the surrending box. I attached two screenshots to show the problem.

We tried a little bit with this and found that setting "data-sizex"="10" fixed it. I don't know if this works like it should.

History

#1 - 01/26/2016 05:26 AM - Dominic Cleal

- Status changed from New to Closed

- Assignee set to Dominic Cleal

- % Done changed from 0 to 100

- translation missing: en.field_release set to 123

I think this was an issue in the German translations, they should only have been translated to the first character (e.g. Angewendet|A becomes "A").
I've fixed the translations for the next release - thanks for the report!
