Description	
According to #1044 partition tables are parsed by erb.

It seems to me that partition table is parsed, but the Variables as listed in http://theforeman.org/projects/foreman/wiki/TemplateWriting are not available.

Revision b99ef03f - 01/15/2012 09:38 AM - Ohad Levy

fixes #1341 - tftp templates can now use @host as well.

History

#1 - 11/20/2011 06:23 PM - Markus Falb

I figured out that the @host.XXX variables are accessible if i deactivate safe rendering, but I have to refer to it without the leading @host.

Instead of <%= @host.name -> this is working: <= name -%>
Confusing, but working.
