

Smart Proxy - Bug #13427

Progname not defined for SYSLOG logger

01/28/2016 03:21 AM - Lukas Zapletal

Status:	Closed	
Priority:	High	
Assignee:	Lukas Zapletal	
Category:	Core	
Target version:	1.11.0	
Difficulty:	trivial	Fixed in Releases:
Triaged:		Found in Releases:
Bugzilla link:	1313860	Red Hat JIRA:
Pull request:	https://github.com/foreman-smart-proxy/pull/370	

Description

According to Ruby API (<http://ruby-doc.org/stdlib-2.1.0/libdoc/logger/rdoc/Logger.html#method-i-add>) if both message and block are missing, progname should be treated as the message. The code in log decorator (buffer) has a bug that was working incorrectly. This shows up if there is SYSLOG logger configured and an error occurs:

```
/usr/share/foreman-proxy/lib/proxy/log_buffer/decorator.rb:19:in `add': undefined method `progname' for #<Syslog::Logger:0x0000000204a8b0> (NoMethodError)
  from /usr/share/foreman-proxy/lib/proxy/log_buffer/decorator.rb:50:in `error'
  from /usr/share/foreman-proxy/lib/launcher.rb:135:in `rescue in launch'
  from /usr/share/foreman-proxy/lib/launcher.rb:110:in `launch'
  from bin/smart-proxy:6:in `<main>'
```

Revision a838204e - 02/24/2016 06:57 AM - Lukas Zapletal

Fixes #13427 - fixed log buffer with SYSLOG

History

#1 - 01/28/2016 03:24 AM - The Foreman Bot

- Status changed from New to Ready For Testing

- Pull request <https://github.com/foreman-smart-proxy/pull/370> added

#2 - 02/23/2016 07:24 AM - Lukas Zapletal

- translation missing: en.field_release set to 71

I need this to be included in the 1.11 release, discovery image does not work without this patch. Thanks!
