

Foreman - Bug #13434

Primary interface with static networking should set DNS according to subnet

01/28/2016 07:01 AM - Marek Hulán

Status: Closed	
Priority: Normal	
Assignee: Marek Hulán	
Category: Templates	
Target version: 1.10.2	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request: https://github.com/theforeman/community-templates/pull/232	
Description	
If the primary interface use static networking, NM won't get the DNS information from DHCP so we need to provide DNS= options in ifcfg file according to what has been set for subnet.

Revision 6784ee86 - 01/28/2016 07:02 AM - Marek Hulán

Fixes #13434 - configure DNS for static primary interface

History

#1 - 01/28/2016 07:04 AM - Marek Hulán

- Status changed from Assigned to Ready For Testing

- Pull request <https://github.com/theforeman/community-templates/pull/232> added

#2 - 03/07/2016 04:03 AM - Marek Hulán

- Status changed from Ready For Testing to Closed

PR was merged, community-templates doesn't seem to be linked to Redmine. The fix was cherry-picked to 1.10 as well.

#3 - 03/08/2016 08:05 AM - Dominic Cleal

- translation missing: `en.field_release` set to 123
