Foreman - Bug #1351

New smart variable and match cannot be entered at same time.

11/23/2011 02:39 PM - Steve Traylen

Description

Following on from IRC:

Foreman 0.4.0

If I add a new smart variable to a class and also add a match within the same form
then the smart variable is not saved.

e.g entering a smart variable form of:

```
name=editfirewall
default value=true
type validate=list
validator constraint=true, false
order=fqdn,hostgrou,os,domain
match=fqdn=lxfssm4408.example.ch
value=true
```

results in a log of

Parameters: {"commit"=>"Submit", "authenticity_token"=>"QWtrc1fTFhDiKpkk2AcNMtNBp4eEc/1oXGdX2cKTbJk=", "id"=>"firewall",
"puppetclass"=>{"lookup_keys_attributes"=>{"new_lookup_keys"=>{"default_value"=>"", "validator_rule"=>"",
"updated_at"=>"1322075394", "lookup_values_attributes"=>{"new_lookup_values"=>{"value"=>"", "_destroy"=>"", "match"=>""}},
"path"=>"fqdn\r\nhostgroup\r\nos\r\ndomain", "_destroy"=>"", "description"=>"", "validator_type"=>"", "key"=>""},
"new_1322075399382"=>{"default_value"=>"true", "validator_rule"=>"true,false", "updated_at"=>"1322075394",
"lookup_values_attributes"=>{"new_1322075455358"=>{"value"=>"false", "_destroy"=>"", "match"=>"fqdn=lxfssm4408.example.ch"},
"new_lookup_values"=>{"value"=>"", "_destroy"=>"", "match"=>""}}, "path"=>"fqdn\r\nhostgroup\r\nos\r\ndomain", "_destroy"=>"",
"description"=>"Use puppet firewall rules.", "validator_type"=>"list", "key"=>"editfirewall"}}, "name"=>"firewall",
"environment_ids"=>["6", "", "10", "", "9", "", "14", ""], "hostgroup_ids"=>["", "", "", "", "", "", "", "", "", "", ""]}}

but the variable is not saved.

Workaround given on IRC.

Add the smart variable first with no match conditions and then add the match conditions as separate
form submits.

@Amos, this seems like the template html used to add a new variable is actually inside the form, so the default submit would always include it.

more then that, the error can't be shown, as the whole div is hidden.

I tried to have a look, but it breaks a bit the pills structure, do you mind taking a look?

#3 - 03/19/2012 04:47 PM - Tray Torrance

I'm hitting this at the nightly release I installed last tuesday, as well. Threw me for quite the loop, as they show up as existing under the "Smart Variables" section of the associated puppet class, but not in the general listing page for "Smart Variables".
