

Foreman - Feature #13519

Inconsistent naming in search and output when searching on smart class parameters

02/02/2016 06:52 AM - Ewoud Kohl van Wijngaarden

Status: Closed	
Priority: Normal	
Assignee: Shlomi Zadok	
Category: API	
Target version: 1.11.0	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases: 1.10.1
Bugzilla link:	Red Hat JIRA:
Pull request: https://github.com/foreman/foreman/pull/3215	
Description	
As a user I'd like to search /api/smart_class_parameters/ for puppet class name and parameter name so I don't have to iterate all values.	
<pre>\$ curl -u user -k https://foreman.example.org/api/smart_class_parameters/?search=parameter%3Dapach e_name Enter host password for user 'api': { "error": {"message": "Field 'parameter' not recognized for searching!", "class": "ScopedSearch::Que ryNotSupported"} }</pre>

Did you try curl -u user -k https://foreman.example.org/api/smart_class_parameters/?search=key%3Dapache_name ?

In the UI it also shows key and not parameter but it searches on the same field.

If this works for you please change this to a bug for inconsistent naming in search and output.

#3 - 02/17/2016 05:47 AM - Ewoud Kohl van Wijngaarden

- Subject changed from Allow searching on smart class parameters to Inconsistent naming in search and output when searching on smart class parameters

You're right, that does work.

#4 - 02/17/2016 06:58 AM - Ewoud Kohl van Wijngaarden

Ori: do you have a similar trick to search for the puppet class name?

#5 - 02/17/2016 07:16 AM - Ori Rabin

'puppetclass' should be searchable: smart_class_parameters?search=puppetclass%3Dapache
