Description

I would like to be able to export a list of systems to excel via csv or excel format directly from foreman.

I recently had to create a list of systems that were physical with more than two processors and wish I could have just easily export the list.

bump.

This would be a great feature, especially when providing reports to upper management/auditors.

- Description updated

- Status changed from New to Closed

Hello,

Foreman 1.3 comes with hammer command line tool that is able to export to CSV. Please test and open a new ticket if it doesn't work as wanted.

Regards,

Benjamin Papillon
