Description

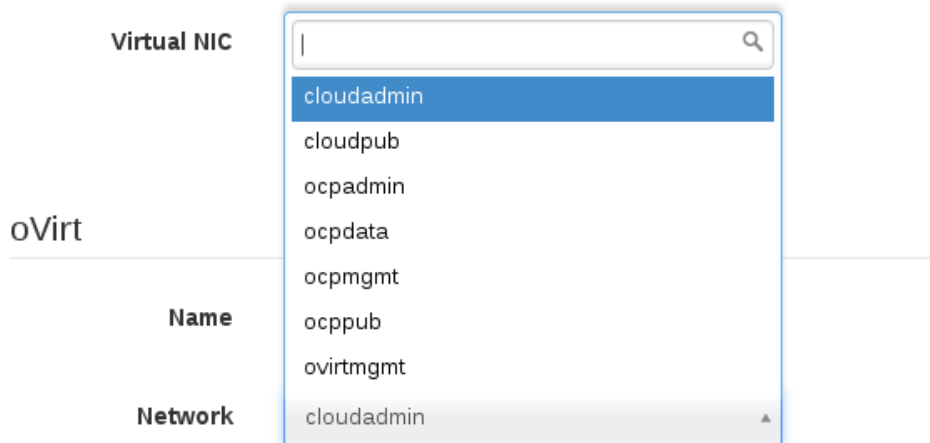

Dear Foreman Team,

I have a problem during the building of an oVirt host from foreman web interface.

I have different network defined in my oVirt Datacenter as you can see in the next screenshot.

Name	Data Center	Description	Role	VLAN tag	Label
cloudadmin	Testbed	cloudadmin	vm	1096	-
cloudpub	Testbed	cloudpub	vm	96	-
ocpadmin	Testbed	ocpadmin	vm	1098	-
ocpdata	Testbed	ocpdata	vm	3098	-
ocpmgmt	Testbed	ocpmgmt	vm	2098	-
ocppub	Testbed	ocppub	vm	98	-
ovirtmgmt	Testbed	Management Network	vm	-	-

When I try to create a new host from Foreman, during the interface configuration I see all the networks, as you can see in the next screenshot.

If I select a network that aren't the first suggested (the first suggested is cloudadmin) for example ocpadmin and I save it, when I reopen the interface configuration form all is OK (is selected ocpadmin in the dropdown menu). After the other configuration I submit the host creation. The result is a new host created on oVirt with a network interface configured with cloudadmin network that are the first suggested in the network dropdown menu. As you can see in the next screenshot.

General	Network Interfaces	Disks	Snapshots	Applications	Affinity Groups	Permissions
New Edit Remove						
Name	Plugged	Network Name	Profile Name	Link State	Type	
▲ nic1	<input checked="" type="checkbox"/>	cloudadmin	cloudadmin	Up	VirtIO	

If I edit the new host and open the interface configuration form I found cloudadmin as selected item in the network dropdown menu as you can see in the next screenshot.

oVirt

Name

Network

As test I tried to create a new host with the hammer cli and I can create a new host successfully with the correct network configuration.

For these reason I think there are some problems in the network configuration form.

Note: I have an old instance of Foreman (1.7.3) and I don't have this problem.

foreman 1.9.3, 1.10 and 1.10.1
oVirt 3.5.5

I already submitted this ticket but it was assigne to Computer resources -oVirt but I think this bug interest the web interface

This bug is blocking for us, I try to debug the problem but I don't find anything

Best regards.
Diego

- Status changed from New to Duplicate

The categorisation isn't terribly important, please don't duplicate the bug needlessly.

#3 - 02/08/2016 04:18 AM - Diego Michelotto

Hi Dominic,

how can I report that the bug is also present in the latest version of foreman if I opened a ticket previously?

The resolution of this bug can be included in the next release of foreman?

Diego

#4 - 02/08/2016 04:21 AM - Dominic Cleal

If you need to report that it's still valid, just add a comment to the existing ticket.

A fix can only be released when it's written, there isn't one yet. If you have one to contribute, please follow <http://theforeman.org/contribute.html>.
