Pull request:	
Description in the logs (now in the nice shiny UI) I can see: <pre>missing :foreman_url: from configurations. 'templates' module is disabled</pre> Yet, I see the feature as active in the list of features. steps to reproduce are simple - comment out the foreman URL from the proxy configuration.

Is the smart proxy reporting the feature as active?

#3 - 02/08/2016 08:11 AM - Ohad Levy

it does, and it does not list it under failed features.

#4 - 02/08/2016 08:15 AM - Dominic Cleal

- Project changed from Foreman to Smart Proxy

- Subject changed from smart proxy active feature count is wrong when templates feature is disabled to Templates module not marked as failed when foreman_url is missing

- Category changed from Smart Proxy to Templates

#5 - 02/10/2016 07:06 AM - Dominic Cleal

- Related to Bug #13028: foreman-proxy has error "Couldn't enable plugin dhcp_isc" on every restart added

#6 - 02/10/2016 07:08 AM - Dominic Cleal

[#13028](#) contains a fix for this issue, as it now raises an exception from the templates module when the setting is missing, which both disables the module and logs that it's disabled. The current impl on develop calls the disable API from within the module itself, forgoing the logging.
