Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1240266
Description of problem:
User looses access to proper Organization and Location when becomes an owner of host.

Version-Release number of selected component (if applicable):

How reproducible:

Steps to Reproduce:
1. Create new user and attach to Default_Location and Default_Organization
2. Edit user. Confirm that Default Location and Default Organization dropdown lists contain added in #1 Orgs and Locs. Do not assign at this moment.
3. Create new or assign existing host to newly created user as owner of host
4. Edit user. Select default Organization and Default Locations from dropdowns
5. Click Submit

Actual results:
Def Org and Loc are empty and dropdown lists are empty too. Not possible to assign Default Org and Loc.
Right column in Organization tab is greyed
User has no access to hosts in Default_Organization and Default_location

Expected results:
It's possible to modify Default Organizations and Locations.

Additional info:

History

#1 - 02/09/2016 09:35 AM - Dominic Cleal

- Subject changed from User looses access to proper Organization and Location when becomes an owner of host. to User loses access to proper Organization and Location when becomes an owner of host.
