

Foreman - Bug #13684

yum-config-manager is not available on RHEL 5

02/12/2016 05:52 AM - Otavio Piske

Status: Closed	
Priority: Normal	
Assignee: Otavio Piske	
Category: Templates	
Target version: 1.10.2	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request: https://github.com/theforeman/community-templates/pull/237	
Description	
I am trying to provision some RHEL 5 VMs and it has errors during the post install phase.	
Steps to reproduce:	
- configure the environments to subscribe to Red Hat Network.	
- provision a VM for RHEL 5.	
Result:	
The install.post.log will contain an error: "line 100: yum-config-manager: command not found"	
The root cause of the error seems to be related to the unavailability of yum-config-manager for RHEL 5 as described here: https://access.redhat.com/solutions/265523 .

- Category set to Templates

Looks like this is specifically the "redhat_register" snippet.

The source for this is at https://github.com/theforeman/community-templates/blob/develop/snippets/redhat_register.erb if you have a patch you can share, you can send fixes through the GitHub UI and it'll be included in the next version of Foreman.
