

Foreman - Bug #13693

Interface Name being converted from using an ` ` to a ` `

02/12/2016 05:15 PM - Chris Pisano

Status: New	
Priority: Normal	
Assignee:	
Category: Facts	
Target version:	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases: 1.10.1
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description I have about 100 hosts that are failing to properly upload Facts to Foreman due to the interface identify having a ` ` in the primary interface. My Facter output is showing the interface name with an ` ` as well as the debug logs in Foreman. A pastebin is below to full debug output of the production.log as well as a full Facter output. production.log: http://pastebin.com/VRzWvbkQ Facter Output: http://pastebin.com/0iraNTUj

Tests have confirmed that an "_" in the NIC name will be converted to a "." also whitespace in a NIC name is converted to a "." causing issues with fact upload.

Current workaround is to ensure that NIC names contain no whitespace or "_" characters. Tests were conducted on Windows Server 2012R2.
