

Foreman - Bug #13694

compute resource provider from plugin missing sometimes

02/13/2016 10:31 AM - Thomas McKay

Status: Duplicate	
Priority: Normal	
Assignee:	
Category: Compute resources	
Target version:	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
<p>I have not consistently reproduced this but there seems to be a situation where the compute resource model is loaded after a plugin (docker) has registered itself as a provider. This results in it being missing from the list of supported_providers.</p> <p>https://github.com/foreman/foreman/blob/develop/app/models/compute_resource.rb#L13</p> <pre>class_attribute :supported_providers self.supported_providers = { 'Libvirt' => 'Foreman::Model::Libvirt', 'Ovirt' => 'Foreman::Model::Ovirt', 'EC2' => 'Foreman::Model::EC2', 'Vmware' => 'Foreman::Model::Vmware', 'Openstack' => 'Foreman::Model::Openstack', 'Rackspace' => 'Foreman::Model::Rackspace', 'GCE' => 'Foreman::Model::GCE', }</pre>
