| Description | |
| We often need to see particular db entries. We can add some columns from the following tables: | |
| audits | |
| compute_resources / compute_attributes | |
| domains | |
| environments | |
| hostgroups | |
| hosts / nics | |
| images | |
| media | |
| operatingsystems | |
| smart_proxies / features | |
| subnets | |
| templates (dump all of them) | |
| tokens (filter out UUIDs) | |
| users (just login names) | |
