

Foreman - Bug #13704

Error when updating host location by name through API

02/15/2016 06:16 AM - David Barbion

Status: Closed	
Priority: Normal	
Assignee: Shlomi Zadok	
Category: API	
Target version: 1.13.1	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases: 1.10.1
Bugzilla link: 1379006	Red Hat JIRA:
Pull request: https://github.com/foreman/foreman/pull/3851	
Description	
Hi,	
I would like to update a host location by providing "location_name" by it results in error: Here is a simple curl command I use:	
<pre>\$ curl -s -X PUT -H "Content-Type: application/json" -k -u hammer:hammer \ -d '{"host": { "location_name": "mag003"}}' \ https://foreman.example.com/api/hosts/host.example.com { "error": {"message": "undefined method `id' for nil:NilClass"} }</pre>	
When I provide "location_id", it works.

History

#1 - 02/15/2016 06:29 AM - David Barbion

This problem occurs when providing an inexistent location.

In my case, it works if I provide full location_name:

```
curl -s -X PUT -H "Content-Type: application/json" -k -u hammer:hammer \
-d '{"host": { "location_name": "Full/path/to/mag003"}}' \
https://foreman.example.com/api/hosts/host.example.com
```
