Foreman - Bug #13711

Can't create new subnet with domain

02/15/2016 07:40 AM - Marek Hulán

Status:	Closed		
Priority:	Normal		
Assignee:	Marek Hulán

Target version:	1.11.0		
Difficulty:		**Fixed in Releases:**	
Triaged:		**Found in Releases:**	
Bugzilla link:	1313858	**Red Hat JIRA:**	
Pull request:	https://github.com/theforeman/foreman/pull/3186		

Description

When I try to create new subnet and select some domain, it does not get saved and it unchecks the selected domain. It does not display any error message, but in logs (and through hammer) an error about invalid :subnet_domains relation can be found. It's caused by validations on relation entity which does not have foreign id, since we are about to save the new record. IMHO validations on relation entity should be removed, we never use the class directly and rely on active record to create it.

History

#1 - 02/15/2016 07:42 AM - Marek Hulán

looks related to #12866 but I think it's a different issue, since it possible to fix it through webui - which is not the case here

#2 - 02/15/2016 07:59 AM - The Foreman Bot
