Description

foreman-proxy uses the following command to list certs:

```
command = "#{@sudo} -S #{@puppetca} --list --all"
```

Using puppet 2.7.5

```
hostname:/usr/share/foreman-proxy # puppet cert --list --all
Could not parse options: wrong number of arguments (1 for 0)

hostname:/usr/share/foreman-proxy # puppet cert --trace --list --all
/usr/local/lib64/ruby/site_ruby/1.9.1/puppet/application/cert.rb:42:in `block (2 levels) in <class
:Cert>'
/usr/local/lib64/ruby/site_ruby/1.9.1/puppet/application.rb:357:in `block (2 levels) in parse_opti
ons'

/usr/local/lib64/ruby/site_ruby/1.9.1/puppet/util/command_line.rb:69:in `execute'
/usr/local/bin/puppet:4:in `<main>'
Could not parse options: wrong number of arguments (1 for 0)
```

Using the list subcommand instead seems to work:

```
puppet cert list --all
```

History

#1 - 12/06/2011 12:34 PM - Florian Koch

Hi,

hm with

```
[root@foreman-proxy yum.repos.d]# rpm -qi puppet
```

```
Name        : puppet                    Relocations: (not relocatable)
Version     : 2.7.5                          Vendor: (none)
Release     : 1.el6                      Build Date: Fri 30 Sep 2011 11:25:10 PM CEST
Install Date: Tue 06 Dec 2011 06:31:35 PM CET     Build Host: rpm-builder.puppetlabs.lan
Group       : System Environment/Base    Source RPM: puppet-2.7.5-1.el6.src.rpm
Size        : 2892208                        License: ASL 2.0
Signature   : RSA/SHA1, Sat 01 Oct 2011 01:04:12 AM CEST, Key ID 1054b7a24bd6ec30
URL         : http://puppetlabs.com
Summary     : A network tool for managing many disparate systems
```

i have no problem, both

```
puppet cert list --all
```

and

```
puppet cert --list --all
```

works as expected

#2 - 12/06/2011 02:26 PM - Jacob McCann

OK, I'll look into this a little more. I'm using ruby 1.9.2 so maybe it has something to do with that.

#3 - 12/20/2011 07:03 AM - Ohad Levy

- Status changed from New to Need more information

#4 - 12/20/2011 09:56 AM - Jacob McCann

This is a puppet bug with ruby 1.9.2 support ... http://projects.puppetlabs.com/issues/7428

I've taken the fix they will be implementing and its working fine now.

So this wasn't a bug with smart-proxy and this can be closed/rejected.

Thanks!
