

Foreman - Bug #13741

Parameter with multiline value gets corrupted when set as hidden

02/16/2016 12:04 PM - Marek Hulán

Status: Closed	
Priority: Normal	
Assignee: Tomer Brisker	
Category: Web Interface	
Target version: 1.12.0	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request: https://github.com/foreman/foreman/pull/3492 , https://github.com/foreman/foreman/pull/3541	
Description To reproduce, 1. add a new parameter (e.g. global) with multiline value like "-----BEGIN RSA PRIVATE KEY-----" 2. check hidden check box 3. uncheck it and see that all "\n" are gone I suppose that's because a password field is used. I think original implementation handled this properly.

Revision 1dc0f39b - 05/06/2016 09:39 AM - Tomer Brisker

Fixes #13741 - Prevent hidden parameters from erasing newline

Switching the input from textarea to password leads to all newline characters being stripped from the value. This PR attempts to prevent this by changing the font of the textarea to a font that displays a bullet instead of every character, thereby preventing the need to change the input into a password field.

Revision ddf1410e - 05/23/2016 04:45 AM - Tomer Brisker

Refs #13741 - Hidden values use masked input for default value

This was missed in the pervious commit. Opening a hidden lookup key led to the default value being displayed using a password input instead of as a masked text area.
