

Smart Proxy - Bug #13747

webrick needs option to change SSL ciphers via configuration vs hard coded values

Bugzilla link: 1282514	Red Hat JIRA:
Pull request: https://github.com/foreman/smart-proxy/pull/380	
Description Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1282514 Description of problem: Currently the foreman-proxy piece has hard coded SSL ciphers in the following file: <code>/usr/share/foreman-proxy/lib/poodles-fix.rb</code> In order for users to pass certain security audits some Ciphers need to be disabled and currently they only approach is to modify the code, remove the offending cipher, and restart foreman-proxy. This workaround does not survive rpm updates and needs to be moved to a configuration file

Revision b73b71a9 - 04/12/2016 06:41 AM - Tomer Brisker

Fixes #13747 - Allow configuration of disabled SSL cipher suites

Added a `:ssl_disabled_ciphers` option to the settings allowing disabling disallowed cipher suits in webrick.
