<b>Description</b>	
Hi,	
fresh installation of develop branch. using sl6.1 and passenger	
bundle install says	
Your bundle is complete! Use `bundle show [gemname]` to see where a bundled gem is installed.	
If i try to access foreman, i got an error	
see attached screenshot

### History

#### #1 - 12/07/2011 03:33 PM - Florian Koch

The solution is to run bundle install with --development (this is installation system wide / in vendor/rails)

Look here

<http://www.ruby-forum.com/topic/213962#947322>

maybe the problem is that i run foreman under root and not foreman

#### #2 - 12/08/2011 05:38 AM - Greg Sutcliffe

I solved this by running "bundle install --path vendor/" in /usr/share/foreman (Debian Squeeze). I need to check if that's a valid method from a clean Debian install though...

#### #3 - 12/20/2011 10:41 AM - Oliver Weinmann

Hi,

I'm running Ubuntu 10.04. The fix doesn't work for me. :(

Restarting Apache after:

bundle install --path vendor/

gives me a new error:

Puppet is not missing constant Resource!

#### #4 - 01/02/2012 05:41 AM - Oliver Weinmann

Thanks to Ohad:

```
echo "gem 'puppet'" >> Gemfile
bundle install --path vendor
```

fixed it.

**#5 - 01/03/2012 10:41 AM - Ohad Levy**

- *Category changed from Power management to Packaging*

**#6 - 03/14/2012 11:13 AM - Ohad Levy**

- *Status changed from New to Closed*

I'm closing this one, as it seems like it does work for the current compute.

once released, we'll support official packages (somehow) :)
