[#7230](#) did set `enforce_available_locales` to false, but this doesn't appear to be in effect.

fixes #13804 - set `enforce_available_locales` in app config

Rails 4.1.9 in rails/rails@4399a23 sets `I18n.enforce_available_locales` to the value in the Rails app config, which now defaults to true, overwriting the false value set in the initialiser. Set it in the app config to ensure it remains off (since `fast_gettext` always sets the best valid locale).

The translation of known locale names which triggers the error on `en_GB` and `pt_BR` is also fixed, as `fast_gettext` uses underscores and `i18n` uses hyphens.
