<b>Description</b>	
<p>Hi,</p> <p>fresh install of the new develop branch. Database is from 0.4 with postgres 9.1</p> <p>bundle install says all installed, if i run gem install pg, all went fine, but i always get</p> <pre>no such file to load -- pg</pre> <pre>while running RAILS_ENV=production rake db:migrate</pre> <p>if i add</p> <pre>gem 'pg', :require =&gt; 'pg'</pre> <p>to the Gemfile and run bundle install all went fine and now i can run</p> <pre>while running RAILS_ENV=production rake db:migrate</pre> <p>without problems</p>

Yes thats correct.

I'm still not 100% sure of how to solve this, one possible solution would be to use bundler groups

something like  
bundle install --with pg
