Pull request: https://github.com/theforeman/foreman/pull/3214	
Description When overriding a parameter in a host group or host we should display the following: Select box if it is a boolean. Number box if it is a integer or real. Unless the param is hidden, in which we should display a the current password box. There is also no need to display the fullscreen button is is a boolean or the hide/unhide button if param isn't already hidden.
