Description

When i try to clone any hostgroup is come back with the following error

Warning!
PGError: ERROR: null value in column "hostgroup_id" violates not-null constraint DETAIL: Failing row contains (null, 2, 1). : UPDATE "hostgroup_classes" SET "hostgroup_id" = NULL WHERE "hostgroup_classes"."hostgroup_id" = 1 AND "hostgroup_classes"."id" IN (1, 2, 3)

If you feel this is an error with Foreman itself, please open a new issue with Foreman ticketing system, You would probably need to attach the Full trace , relevant log entries, and it is highly recommended to also attach the foreman-debug output.

#3 - 03/13/2016 12:07 PM - Eric Helms

- Project changed from Katello to Foreman

- Category deleted (83)

- translation missing: en.field_release deleted (86)

#4 - 03/14/2016 09:33 AM - Dominic Cleal

- Subject changed from Clone hostgroup Fail to Clone hostgroup Fail with null value in column "hostgroup_id" violates not-null constraint

- Category set to Host groups

- Priority changed from High to Normal

- Difficulty deleted (easy)

Which version of Foreman is this exactly? Look at the About page or run rpm -q foreman.

Can you provide a simplified reproducer? I can't reproduce this on Foreman 1.10.2 with a host group with environment and a single class assigned.

If you have a reproducer, please enable debug SQL logging in settings.yaml and attach production.log while you perform the cloning operation:

```
:logging:
  :level: debug

:loggers:
  :sql:
    :enabled: true
```

(http://theforeman.org/manuals/1.10/index.html#7.2Debugging)

- File foreman_hostgroup-clone_without_location.txt added

I'm facing the same issue on my katello install.

I enabled debug logging as instructed in comment 4.

The first try was done with my default organisation selected and no location. This resulted in the mentioned sql-error.
(Attachment foreman_hostgroup-clone_without_location.txt)

The second try was done with set organisation and locatiion. Again the same sql-error.
(Attachment foreman_hostgroup-clone_with_location.txt)

And a third try with any organisation or location selected. This worked. No sql-error.
(Attachment foreman_hostgroup-clone_without_organisation_and_location.txt)

Without an organisation but with selected location, the sql-error is back.
(Attachment foreman_hostgroup-clone_without_organisation.txt)

For me cloning only works, when no organisation and location is set altough the host group that
should be cloned is assigned to both (organisation and location).
