<b>Pull request:</b>	
<b>Description</b> Smart proxy API in the Foreman needs an entry point(s) for fetching puppet related info about the proxy: <ul style="list-style-type: none"><li>• proxy plugin version</li><li>• count of managed hosts</li><li>• list of puppet environments with counts of classes</li><li>• last puppet events</li><li>• host configuration statistics (% of hosts without report, out of sync, etc.)</li></ul>
