| Description | |
| Smart proxy API in the Foreman needs to provide entry points for managing puppet CA on a proxy: | |
| Basic info about puppet ca: | |
| <ul style="list-style-type: none">• show proxy plugin version• count of managed hosts• certificate counts (pending, valid, revoked)• ca certificate expiry date• count of autosign entries | |
| Autosign entries management: | |
| <ul style="list-style-type: none">• list autosign entries• create and delete autosign entries• list puppet certificates | |
| Certificate management: | |
| <ul style="list-style-type: none">• list certificates (provide: cert name, state, valid from, expires, fingerprint) | |
