Pull request:	https://github.com/theforeman/foreman/pull/3242		

Description

Host#import_host_and_facts does to many things. While importing host is class responsibility, facts importing is host instance responsibility. This makes it hard if plugins like foreman-tasks wants to make facts importing a background process while keeping host importing as is. In fact it makes the foreman tasks plugin to re-implement the importing which gets out of sync every now and then.
