<b>Description</b>	
<p>While the <i>exact</i> same configuration works with VNC (so the CA is trusted and network.websocket.allowInsecureFromHTTPS is set to true), with SPICE I'm getting in the JS console:</p> <pre>Content Security Policy: The page's settings blocked the loading of a resource at https://sledge.kvedulv.de:5911/ ("connect-src https://sledge.kvedulv.de ws: wss:").</pre> <p>I think the message is not correct, as the Header looks perfectly fine:</p> <pre>default-src 'self'; connect-src 'self' ws: wss:; font-src 'self'; frame-src 'self'; img-src 'self' *.gravatar.com data:; media-src 'self'; object-src 'self'; script-src 'unsafe-eval' 'unsafe-inline' 'self'; style-src 'unsafe-inline' 'self';</pre> <p>This is with Iceweasel (Debian's Firefox) 44.0.2.</p>
