Description	
<p>Many core functional tests print API deprecation warnings when testing deprecated API controllers, actions and parameters.</p> <p>These Foreman::Deprecation.api_deprecation_warning calls should be expected in the tests so a) they don't clutter rake test output, and b) deprecation tests verify they're being logged too.</p> <p>API v1 routes:</p> <ol style="list-style-type: none">DEPRECATION WARNING: Your API call uses deprecated behavior, Config templates were renamed to provisioning templates. fixes #13941 - expect deprecation warnings in tests

When testing deprecated routes, parameters etc, expect the deprecation warnings to both test that it's logged and to prevent the logging from cluttering test output.
