Description I can see a couple of uses for this kind of feature. <ol style="list-style-type: none">1. Login hint "Your LDAP credentials" "Your XXX/ domain account"2. Legal disclaimers "Our lawyer said we had to put up this banner." In my case I am looking for the first one. It seems to me this belongs in the "settings" framework in the "auth category" maybe "login_message". I'm sure I could go change template or something like that but having this configurable would be nice.
