Foreman - Feature #14030

Associate IPMI interfaces with domains and subnets

03/02/2016 06:27 PM - Alan Evans

Description

It seems that IPMI interfaces don't get tied to subnets and domains the way the primary interface does. (Does foreman do other interfaces?)

It would be nice to have the subnet/domain associated automatically.

History

- Category set to BMC

- Status changed from New to Need more information

You can set a subnet and domain for a BMC/IPMI interface under the interface settings when editing a host. Is there something else you mean?

#2 - 03/03/2016 03:51 AM - Marek Hulán

I guess this is more about facts importing and auto-association?
