**Description**

This test fails between visit and within because the table isn't there yet:

```
test "uncheck override" do
  visit puppetclass_lookup_keys_path
  within(:xpath, "//table") do
    click_link "ssl"
  end
```

This might also start happening in test 'can hide value when overriden' which starts the same as the test above.

It looks quite similar to #13293, where the timeout does appear to be working as the test takes over thirty seconds:

```
15:46:30 PtableIntegrationTest#test_0003_make sure that ptable names with slashes and dots work = 4.13 s = .
15:46:33 PuppetclassLookupKeyIntegrationTest#test_0001_index page = 2.95 s = .
15:46:37 PuppetclassLookupKeyIntegrationTest#test_0002_edit page = 3.76 s = .
15:46:49 PuppetclassLookupKeyIntegrationTest::js tests#test_0001_can hide value when overriden = 11.94 s = .
15:47:27 PuppetclassLookupKeyIntegrationTest::js tests#test_0002_uncheck override = 38.01 s = E
15:47:31 PuppetclassIntegrationTest#test_0001_edit page = 3.90 s = .
15:47:34 RealmIntegrationTest#test_0001_index page = 2.73 s = .
```

**#4 - 03/03/2016 03:05 AM - Dominic Cleal**

Assertion output:

```
15:49:40  10) Error:
15:49:40 PuppetclassLookupKeyIntegrationTest::js tests#test_0002_uncheck override:
15:49:40 Capybara::ElementNotFound: Unable to find xpath "//table"

*- Status changed from New to Resolved*

Tentatively marking as resolved as it's probably the same as [#14340](#) and [#13293](#), please re-open if it recurs.
